BATTERY AND LITHIUM SECONDARY )  
BATTERY USING THE SAME )

SUPPLEMENTAL RESPONSE TO ELECTION REQUIREMENT

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

In response to the Office Communication mailed November 20, 2009, and supplemental to the Response to the Election Requirement filed October 14, 2009, Applicant hereby further elect, with traverse, hydrogen atom as the elected species of R<sup>25</sup>, R<sup>26</sup>, and R<sup>27</sup>, oxalyl as the elected species of W, and alkynyl group having 2 to 12 carbon atoms as the elected species of Y<sup>6</sup> recited in claims 13-15.

The species election is traversed since Applicant contends that all of the pending claims are readable on all of the species noted by the Examiner in the Office Action. Of course, Applicant maintains, as noted by the Examiner in the Office Action, that the designated species are not obvious variants of each other.

Consideration and allowance of the instant application are now respectfully requested.

Respectfully submitted,

Dated: December 1, 2009
